

31. Principle of UFOnavics

In recent years the UFOnavics were trying to tell me something. The fool who I am couldn't grasp the idea. But, the logic of absolute geometry intuitively leads to the concept that the free cosmic flight is based upon the mechanism such that

$$(a) \quad \dim_{\Phi} \Phi^3 i_1 \cdot (3+1) \sqrt{\left\{ \cos 2\Theta_{STR} \sqrt{\frac{2\Theta_{STR}}{\cos 2\Theta_{STR}}} \right\}^{\pi \frac{\Phi^3 i_1}{\text{Spin}}}} = \frac{255207541}{3}.$$

The previous equation is absolutely true, for

$$(b) \quad 255207541 \cdot G_{6.673} = 1703 \cdot 10^{5.9999999...},$$

and it is even more than true because of

$$(c) \quad 255207541 \cdot G_{6.673} \dim G = 3152643840.$$

All this is absolutely justified by the universal system of harmony

$$(d) \quad 3152643840 \cdot \frac{e^{5\Phi\pi e i_1 \sqrt{2}}}{X} = \frac{10^{60}}{398}.$$

Of course, the problem ends up on the absolute self-reference of geometry

$$(e) \quad 398^{\Phi\pi i_1} = \Phi\pi i_1 \cdot 10^{16.0000...}.$$

The ultimate goal is how to replace the jet propulsion principle of flight. Since long it seems to me that the concept of antigravity is somewhat illogical. Instead, the above conserves the gravitational framework.

No doubt that the reader has already memorized the two universal energy formulae:

$$(f) \quad U_E^{G/\dim G} \equiv 10^e;$$

$$(g) \quad U_E^{\oplus} \equiv \pi \frac{\Phi^3 \sqrt{i_1 i_2}}{\text{Spin}}.$$

Then, what they do exactly mean to UFOnavics?

Whatsoever, the decent readership could be convinced in the absolute truth of the supeunification theory that provides the new fundamental principles of the exact natural philosophy. Any doubt that the young generations of nations will be smarter enough to make practical use of the principles above and elsewhere.

To around up, the Bigbang cosmology asks to be begin with

$$(h) \quad \frac{\exists}{\text{©@}} \cdot \left\{ \cos 2\Theta_{STR} \sqrt{\frac{2\Theta_{STR}}{\cos 2\Theta_{STR}}} \right\} = \frac{108\,595\,064}{9}$$

and reduced to

$$(i) \quad \frac{276\,449\,709}{108\,595\,064} = \cos 2\Theta_{STR}.$$

It is two decades ago that we have picked up certain experimental values of constants and later configured the modern physics as

$$(k) \quad \left\{ Ghm_e e^\pm c = \begin{Bmatrix} 6.673 \cdot \\ \cdot 6.62606876 \cdot \\ \cdot 9.10938188 \cdot \\ \cdot 1.602176462 \cdot \\ \cdot 2.99792458 \end{Bmatrix} \right\} \cdot \left\{ \begin{array}{l} \dim(Ghm_e e^\pm c) = \\ = \Phi^5 \sqrt{2} \sqrt{\sqrt{2}} \end{array} \right\} \\ \hline \alpha_{137.035999^{-1}} a_{e(0.0011596521)} = 4263975213.$$

Physics reduces to

$$(l) \quad 4263975213 \cdot \frac{\cos 2\Theta_{STR}}{2\Theta_{STR}} = 25048283$$

because of

$$(m) \quad 25048283 \cdot \pi \frac{\Phi^3 i_1}{\text{Spin}} \dim_\Phi \Phi^3 i_1 \cdot (3+1) = \frac{979\,228\,261}{2}$$

and due to the most fundamental logos

$$(n) \quad \frac{979\,228\,261 \cdot \{ \tilde{E}\tilde{E} \cdot \mathbf{U}_E \cdot E_{Eins} \}}{1 + 1/12367.42624} = \frac{\pi}{\Phi} \cdot 10^{46}.$$

The human chromosome number, 46, fluctuates, but in a most standard and absolutely calculable way

$$(o) \quad \Phi^{\pi i_1} \sqrt[5]{5423024925^e} = 12367.42624 \cdot$$

Imagine that there were no God's method of HIs. The method provides the sole possibility that we will know fundamental principles in the depth of the physical and biological reality. Those principles are of pure mathematical origin.
