

The Brain & the Cosmos

(The mechanism of their communication)

We return back to the folklore mythological codes of absolute geometry and related cosmology. They were fixed in the written literature much before me, but I intentionally hide those sources which anyone wishful can search and find out, however. I am interested to know what people will say on this topic. As the reader knows well, nearly every cultured person in this world feels obliged to humiliate the Mongol nomads. As an ancient Mongolian saying goes, “Jaws eating bushes will be once waste bones, whilst bushes eaten will ever flourish”.

Of course, we are many times more interested to know the physical mechanism of the Cosmos-Brain intercommunications.

Hipparchus simply postulated his number, 310952, of geometric implication. The Mongolian number is the solution to an algebraic equation of cosmological content. The equation should be solved by memory, as demands nomadic tradition.

Anyway, we have a configuration

$$(1) \quad \{1292049, 310952\}_+^x.$$

We have postulated the cosmological constant and proved its validity

$$(2) \quad G / \dim G = \text{Cosm.}.$$

We have learned many different tricks of God, so

$$(3) \quad \left\{ \{1292049, 310952\}_+^x \cdot \text{Cosm.} \right\}^{\text{Cosm.}} = \frac{10^{66.99999\dots}}{2\pi}.$$

The standard way of analysis is

$$(4) \quad \sqrt[e]{\{1292049, 310952\}_+^x \Phi \pi} = 2008 \cdot 10^{29.99999999\dots}.$$

The year 2008 was important for me and for my work.

All the more,

$$(5) \quad \sqrt[e]{\{1292049, 310952\}_+^{\times 2\Phi\pi i}} = \frac{10^{87.00000\dots}}{189}.$$

The channel of transcosmic communication is the spin axis of the Superstructure

$$(6) \quad \sqrt[\text{Spin}]{\{1292049, 310952\}_+^{\times}} = \frac{10^{26}}{272927}$$

Automatically,

$$(7) \quad 272927 \cdot 2\Theta_{STR.} = \frac{164\,255\,405}{9}$$

Your author, the fool, at last moment senses the character of the Unifield such that

$$(8) \quad \begin{aligned} & \cos 2\Theta_{STR.} \sqrt{\left\{ \frac{Ghm_e e^{\pm} c \cdot \dim(Ghm_e e^{\pm} c)}{\alpha a_e} \right\} \frac{2\Theta_{STR.}}{\cos 2\Theta_{STR.}}} \\ & \cdot \left\{ \frac{\exists}{\textcircled{a}} \cdot \left\{ \mathbf{X} \cdot e^{5\Phi\pi e i_1 \sqrt{2}} \right\} \right\} = \frac{10^{90.9999\dots}}{\textcircled{a}}. \end{aligned}$$

Memorize that the two codes are the Cosmic Message to mankind at the dawn of civilization. We now accomplish God's Wish deciphering the mystery of life on the Earth globe (9)

$$\{1292049, 310952\}_+^{\times} \cdot \left\{ \textcircled{\heartsuit} \left\{ \mathbf{Cr}_+^{\times} \cdot 22727 \right\} \right\} = \Phi\pi \cdot 10^{56.9999\dots}.$$

On this cosmological evolution ends up.
